

MASTER CLASS
IN IMPLANT THERAPY 2024-25

SM CUTTING EDGE IMPLANT THERAPY - POSTERIOR ZONE

6-7-8 FEBRUARY 2025

36 CONTINUING
EDUCATION UNITS

12 HOURS LECTURES

12 HOURS HANDS-ON

CONTENTS :

- Clinically applied surgical anatomy
- Gingival phenotype and peri-implant soft tissue management
- Principles and techniques of flaps, soft tissue manipulation and suturing
- Principles and techniques for connective tissue graft and free gingival graft
- Essential success criteria for a predictable long-term result, from a surgical and prosthetic point of view
- Implant therapy and digital dentistry
- Current trends, criteria and technique for immediate implant in the posterior area
- Guided Surgery and Healing
- Standard and digital impression techniques
- Abutment selection: Making the right choices
- Final posterior crown design and delivery for the single and multi-unit restorations
- Dental materials advances and their implications in implant dentistry
- The advantages of Zirconia and CAD/CAM for dental implant restorations
- Follow-up, maintenance and complications

HANDS-ON TRAINING :

- Guided surgery and 3D printing
- Modification of the gingival phenotype and simultaneous implant placement
- Increasing mucosal thickness
- Increasing the width of keratinized mucosa
- Immediate implant placement, immediate impressions and custom healing abutment
- Impression taking techniques and handling of prosthetic components
- Live surgery

FORMATIONDMD.CA

Implant placement for the replacement of posterior teeth is the most common procedure in our practice. The clinician must therefore be able to master specific techniques to ensure optimal and predictable long-term results such as virtual planning, implant placement technique, management of both hard and soft tissues and of course restoration.

Digitalization in dentistry, virtual planning and guided surgery allow us today to be able to offer custom made treatments according to the anatomy of each patient with reproducible and predictable results. Immediate placement of the implant in the posterior area remains controversial, but possible according to certain very specific criteria. The improvement of implant dentistry in the posterior zone allows the clinician to make the transition, later, with the techniques acquired with more confidence, when the time comes to treat the aesthetic anterior zone.

This advanced three-day classes provides you with all the essential elements to maximize both surgical and prosthetic results from planning to final restoration.

Our goal is to transmit to you all the information acquired from the scientific literature, applicable clinically, to allow you to make the right decision according to the situation of each patient. Hands-on training designed specifically to perfect the techniques learned and carefully selected live surgery will help you assimilate the material in order to take your practice to a higher level.

OUR TEAM

DRS JEAN EL-FATA DMD, MSC, FRCD(C)
ORAL & MAXILLO-FACIAL SURGEON

Dr. El-Fata received his dental degree from the University of Montreal. He completed a year of multidisciplinary residency at the Notre Dame Hospital of the CHUM, he then began his specialty in oral and maxillofacial surgery at the Laval University and the Enfant-Jésus Hospital. He also completed a master of science (M.Sc.) program at the Faculty of Medicine of Laval University. He is a Fellow of the prestigious Royal College of Canada in his specialty. He subsequently completed specialized training in implantology at Baylor College of Medicine in Texas. Dr. El-Fata practices in private practice in Quebec city.

DR. DOMINICO MORIELLI DDS, BSC
ORAL & MAXILLO-FACIAL SURGEON

Dr. Morielli received his bachelor's degree in physiology and his doctorate in dentistry from McGill University. He subsequently completed a residency at Saint Mary's Hospital before beginning his specialty in oral and maxillofacial surgery at the Enfant-Jésus Hospital. He completed multiple subspecialty internships in implantology at the Branemark Osseointegration center in Sweden. He taught for more than 15 years at Laval University at the undergraduate and postgraduate levels. In his 30-year surgical career, he participated in the training of several dental surgeons in implant surgery and practiced his specialty in private practice as well as at the Enfant-Jésus Hospital in Quebec.

DR. SAMER ABI NADER, BSC DMD MSC
FRCD(C) PROSTHODONTIST
GUEST INSTRUCTOR IN COURSE SESSION I-II-IV

Dr. Samer Abi Nader is a dental specialist in Prosthodontics, an associate Professor and associate Dean of Undergraduate Dental Education at the Faculty of Dentistry McGill University. He received a Degree in Physiology from McGill before completing his Dental Degree at the University of Montreal. After a one-year multidisciplinary residency program at the Jewish General Hospital, he completed his training in Prosthodontics at the University of Montreal.

He received multiple awards for his excellence in dental education.

In addition to his academic position, Dr. Abi Nader currently holds also a private practice in downtown Montreal and Moncton.

A COMPLETE COMPREHENSIVE COURSE COMBINING

- EVIDENCE BASED TECHNIQUES
- HANDS ON WORKSHOP
- LIVE SURGERIES

TESTIMONIALS

«By far the best implantology course I have taken! Very clear explanations, outstanding supervision. Reliable and reproducible techniques based on scientific literature. I recommend it to everyone. Thank you a thousand times for everything»

Laurence Bourdeau DMD, Blainville

«This training is simply on another level from everything I have taken in my 25 years of practicing dentistry and implantology.

The techniques taught are supported by scientific literature and applied clinically with a hindsight of 20 years on all cases shown.

My way of practicing implantology has completely changed, the techniques learned can be applied very quickly. The honest sharing of knowledge, long-term follow-up, practical exercises and live surgeries truly make this training unique.

I highly recommend this course in implantology, beyond all expectations.»

Marcel Chbat DMD, Ottawa

«This is the best combined hard and soft tissue implantology course I have taken in my career. Drs El-Fata and Morielli are passionate and true masters of the profession. Comprehensive training, exceptional practical exercises and unparalleled live surgeries.

Training that allows us to take our practice to another level!»

Christopher Dang, DMD, Gatineau

«Training based on clinically applicable scientific evidence. It is accessible, unpretentious and focused on the well-being of the patient»

Michèle Boivin DMD, Jonquière

«Thank you for this excellent, comprehensive and relevant training! The explanations are clear and the clinical applications are immediate, both in implant dentistry, periodontics and prosthodontics!

Drs El Fata and Morielli are extremely generous with their advice and experience»

Julie Dompierre DMD, Chicoutimi

«...Very impressed with the content and structure of the course»

Jacques Goulet Oral & Maxillofacial surgeon, Saint Jérôme
