

MASTER CLASS
IN IMPLANT THERAPY 2024-25

SV THE TOTALLY EDENTULOUS PATIENT

18-19-20 SEPTEMBRE 2025

36 CONTINUING
EDUCATION UNITS

12 HOURS LECTURES

12 HOURS HANDS-ON

CONTENTS :

- Biology and physiology of bone resorption
- Virtual planning for the edentulous patient and surgical execution
- Surgical treatment options for the maxilla and mandible
- Soft tissue management for the edentulous arch
- Prosthetic treatment options for the maxilla and mandible
- Stages of surgical and prosthetic treatment
- Immediate loading and final restorations
- Management of complications, monitoring and maintenance

HANDS-ON TRAINING :

- Surgery on model
- Impression techniques
- Techniques for immediate loading
- Live surgery on mandible and maxilla

Rehabilitation of the completely edentulous maxilla or mandible represents one of the most important oral rehabilitation services offered in implant dentistry. Indeed, tooth loss affects more than 300 million people worldwide, also showing an increase in incidence each year (3%). In this context, surgical and implant-supported prosthetic rehabilitation of patients with moderate to severe atrophy is difficult due to several factors specific to the edentulous person. Patients characterized by long-term complete edentulism often present with these unique conditions.

The atrophy caused by edentulism limits the treatment options offered to patients in both the mandible and the upper jaw.

To increase the predictability of our treatments, planning and guided surgery are required today.

Over the years and with the evolution of digital dentistry, our treatments are more predictable with a better long-term prognosis, however implant treatment must always be based on the final restoration. The clinician must therefore master surgical planning and management of the final restoration before starting treatment.

This advanced three-day training provides you with all the essential elements to maximize both surgical and prosthetic results, from planning to final restoration.

Our goal is to transmit to you all the information acquired from the scientific literature, applicable clinically, to allow you to make the right decision according to the situation of each patient. Practical exercises designed specifically to perfect the techniques learned and carefully selected live surgery will help you assimilate the material in order to take your practice to a higher level.

OUR TEAM

DRS JEAN EL-FATA DMD, MSC, FRCD(C)
ORAL & MAXILLO-FACIAL SURGEON

Dr. El-Fata received his dental degree from the University of Montreal. He completed a year of multidisciplinary residency at the Notre Dame Hospital of the CHUM, he then began his specialty in oral and maxillofacial surgery at the Laval University and the Enfant-Jésus Hospital. He also completed a master of science (M.Sc.) program at the Faculty of Medicine of Laval University. He is a Fellow of the prestigious Royal College of Canada in his specialty. He subsequently completed specialized training in implantology at Baylor College of Medicine in Texas. Dr. El-Fata practices in private practice in Quebec city.

DR. DOMINICO MORIELLI DDS, BSC
ORAL & MAXILLO-FACIAL SURGEON

Dr. Morielli received his bachelor's degree in physiology and his doctorate in dentistry from McGill University. He subsequently completed a residency at Saint Mary's Hospital before beginning his specialty in oral and maxillofacial surgery at the Enfant-Jésus Hospital. He completed multiple subspecialty internships in implantology at the Branemark Osseointegration center in Sweden. He taught for more than 15 years at Laval University at the undergraduate and postgraduate levels. In his 30-year surgical career, he participated in the training of several dental surgeons in implant surgery and practiced his specialty in private practice as well as at the Enfant-Jésus Hospital in Quebec.

DR. NANCY DUBOIS CD, DMD, MSCD, CERT
(PROSTHO), FACP
PROSTHODONTIST
GUEST INSTRUCTOR IN COURSE SESSION V

Dr. Dubois received her DDS degree from Laval University in 1992. She then served as a dental officer for the Canadian Armed Forces for 24 years, retiring in 2016. She started as a general dentist for a period of 12 years then specialized in prosthodontics at the University of Connecticut from 2004 to 2007 where she obtained a certificate in Prosthodontics and a master's degree in Dental Sciences. Between 2007 and 2017, she served as Commanding Officer at the Petawawa Military Garrison, at the rank of Lieutenant Colonel. She acted as Commander of a multi-disciplinary dental clinic, Specialist in prosthodontics in charge of dental reconstructions and mandibular repositioning appliances for sleep apnea and Chief Advisor in prosthodontics for the Canadian Armed Forces. Dr. Dubois practices in private practice in Quebec city.

DR ADRIEN POLLINI, DMD, MSCD, CERT
(PROSTHO)
PROSTHODONTIST
GUEST INSTRUCTOR IN COURSE SESSION V

Dr Pollini obtained his DMD at the University of Lyon in 2009. He then received an ITI (International team for Implantology) scholarship at the University of Louisville in the United States where he completed his training in implants for five years. During this period he obtained a specialty certificate in prosthodontics as well as a master's degree in science.

He is the author of the book "supracrestal implantology" published by éditions Quintessences in 2016 as well as numerous articles of international scope. He is currently an associate professor in the prosthetics department at Laval University and practices in private practice in Quebec city.

A COMPLETE COMPREHENSIVE COURSE COMBINING

- EVIDENCE BASED TECHNIQUES
- HANDS ON WORKSHOP
- LIVE SURGERIES

TESTIMONIALS

«By far the best implantology course I have taken! Very clear explanations, outstanding supervision. Reliable and reproducible techniques based on scientific literature. I recommend it to everyone. Thank you a thousand times for everything»

Laurence Bourdeau DMD, Blainville

«This training is simply on another level from everything I have taken in my 25 years of practicing dentistry and implantology.

The techniques taught are supported by scientific literature and applied clinically with a hindsight of 20 years on all cases shown.

My way of practicing implantology has completely changed, the techniques learned can be applied very quickly. The honest sharing of knowledge, long-term follow-up, practical exercises and live surgeries truly make this training unique.

I highly recommend this course in implantology, beyond all expectations.»

Marcel Chbat DMD, Ottawa

«This is the best combined hard and soft tissue implantology course I have taken in my career. Drs El-Fata and Morielli are passionate and true masters of the profession. Comprehensive training, exceptional practical exercises and unparalleled live surgeries.

Training that allows us to take our practice to another level!»

Christopher Dang, DMD, Gatineau

«Training based on clinically applicable scientific evidence. It is accessible, unpretentious and focused on the well-being of the patient»

Michèle Boivin DMD, Jonquière

«Thank you for this excellent, comprehensive and relevant training! The explanations are clear and the clinical applications are immediate, both in implant dentistry, periodontics and prosthodontics!

Drs El Fata and Morielli are extremely generous with their advice and experience»

Julie Dompierre DMD, Chicoutimi

«...Very impressed with the content and structure of the course»

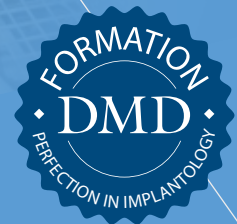

Jacques Goulet Oral & Maxillofacial surgeon, Saint Jérôme
